

Educational Grant Program

Commercial customers of Efficiency United participating utilities can apply for funding to better understand their electric or natural gas usage and define energy savings opportunities.

The Efficiency United Educational Grant Program (EGP) can help you identify energy savings opportunities to help boost your bottom line. Funding from EGP can help you identify energy waste reduction opportunities for your HVAC systems, industrial processes, or entire facility.

Customers can use EGP funding for:

- Comprehensive facility or targeted system/process assessments.
- Production line assessments.
- Sub-metering of electricity, natural gas, steam, compressed air, or other energy related resources.
- Development of building or process energy models.
- Building/Energy Management System retro-commissioning assessments.
- Energy efficiency related educational courses or certifications.

Interested? Here is how to participate!

- Step 1.
Discuss your educational need with your Account Manager.
- Step 2.
Sign the provided Customer Participation Agreement.
- Step 3.
Complete your assessment, installation, or educational course.
- Step 4.
Provide verification that the agreed upon action is complete.

Participating Natural Gas Utilities

- Michigan Gas Utilities
- UMERG – WPS
- Xcel Energy

Participating Electric Utilities

- Alpena Power Company
- UMERG - We Energies
- UMERG - WPS
- Xcel Energy
- Baraga Electric Utility
- Crystal Falls Electric Department
- Gladstone Power & Light
- City of Croswell
- City of Dowagiac
- City of Wakefield
- Grand Haven Board of Lighting & Power
- Indiana Michigan Power Company
- L'Anse Electric Utility
- Negaunee Electric Department
- Village of Dagget
- Village of Newberry
- Village of Union City
- Norway Department of Power & Light
