

Strategic Energy Management Commercial & Industrial

Strategic Energy Management (SEM) is a yearlong cohort-based series of workshops and one-on-one coaching sessions that will help move your company's culture toward sustainability by reducing energy costs and greenhouse gas emissions.

Offered for participating Efficiency United utilities, the workshops and coaching focus on continuous improvement, integrating Lean Six Sigma, and other cost-saving and operational excellence initiatives.

A team of experts provides the training, motivation and engineering support for your business to succeed. They will help you identify and implement no-cost and low-cost operational, maintenance and behavioral changes to reduce power consumption.

Eligibility

- Your business must be a commercial or industrial customer in a participating Efficiency United utility's service territory.
- SEM is available to commercial and industrial facilities such as manufacturing, municipalities, transportation, higher education and healthcare.
- The SEM program is designed for energy managers, facility managers, plant managers, maintenance supervisors and financial personnel.
- Ideal facilities will have greater than 2 million kWh and 400,000 therms gas consumption annually. Smaller facilities may still qualify based on opportunities and program needs.

Workshop and event details

- The group workshops offer training and consultations by CLEAResult. They have developed the curriculum and successfully implemented SEM with over 500 companies nationally. The program is delivered in an interactive format to provide a competitive edge to participating companies.
- Individual workshops are conducted at the participant's site and usually last two to four hours, depending on site complexity and nature of activity.
- Participating companies will have the opportunity to host group workshops at their sites (not required).

Proven methods for saving energy with low-/no-cost methods:

- Tracks performance and forecasts usage using a statistical energy model
- Provides technical and educational tools, as well as other resources
- Includes four cohort sessions and three on-site visits
- Allows for collaboration with peers in other industries
- Introduces you to new best practices and energy management processes
